

Table 3. Multivariable-adjusted associations of body temperature with adiposity markers, stratified by gender and menopausal status, CoLaus study, Lausanne, 2009-2012.

	Men	Premenopausal women	Postmenopausal women
Body mass index (kg/m ²)	0.112 ***	-0.021	0.038
Waist (cm)	0.111 ***	-0.003	0.076 *
Hip (cm)	0.024	-0.060	-0.004
Waist to hip ratio	0.133 ***	0.076	0.122 ***
Body area (m ²)	0.057	-0.043	0.037

Results are expressed as standardized regression coefficients. Analysis by linear regression using body temperature as dependent variable and adjusting for age, resting heart rate, high sensitivity C-reactive protein (log-transformed) and insulin (log-transformed): *, p<0.05 ; **, p<0.01 ; ***, p<0.001.
